Conquer 260

Agility in deep snow

Designed with a softer rubber compound for better deep-snow performance, the Camso Conquer 260's 2.6-inch lug design powers through the deepest mountain snow with ease. This lightweight track increases your machine's available horsepower, requiring less throttle input in turns and on side hills.

- 2.6" alternating single-angled lugs push performance in all snow riding conditions
- Lightweight model increases available HP thanks to less rotating mass
- Lug design requires 20% less rider input on turns and 25% less throttle to hold on side hills
