

CAMSO

Cobra 1.6

Performance, on or off the trail

The Cobra design taken to another level. Excellent performance on the soft, loose snow of ungroomed trails, now available in a 1.6" lug height for even better traction and performance while on/off-trail.

- Cupped lugs for superior acceleration and braking in loose, soft snow conditions
- Flexible lug design for superior off-trail performance
- Designed for factory pre-studded, select lugs are more rigid for traction on hard-packed snow performance

MODEL	DIMENSIONS	LUG HEIGHT	WEIGHT	DRIVE PITCH	CLIP CONFIG.
9264C	15" x 137" (38 cm x 348 cm)	1.6" (43 mm)	43 lb. (19.5 kg)	2.86" (73 mm)	Full ■
